Weibo

Since the domestic refined oil price adjustment on April 17, 2025, international oil prices have fluctuated. Based on the current domestic refined oil pricing mechanism, the average price of the 10 working days prior to April 30 was less than 50 yuan per ton lower than the average price of the 10 working days prior to April 17. According to Article 7 of the "Petroleum Price Management Measures," gasoline and diesel prices will not be adjusted this time, and the unadjusted amount will be accumulated or offset in the next price adjustment.

China National Petroleum Corporation (CNPC), China Petroleum & Chemical Corporation (Sinopec), and China National Offshore Oil Corporation (CNOOC), along with other crude oil processing enterprises, must organize the production and transportation of refined oil products to ensure stable market supply and strictly implement national price policies. Relevant departments at all levels should strengthen market supervision and inspection, severely punish any violations of national price policies, and maintain normal market order. Consumers can report price violations through the 12315 platform.
