International oil prices have fluctuated recently. Based on a comparison of the average price of the 10 working days prior to December 22nd with the average price of the 10 working days prior to the last price adjustment , and in accordance with the current refined oil pricing mechanism, starting from 24:00 on December 22nd , domestic gasoline and diesel prices (standard grades, the same below) will be reduced by RMB 170 and RMB 165 per ton, respectively . The adjusted maximum retail prices of gasoline and diesel in various provinces (autonomous regions, municipalities) and central cities are shown in the attached table.

China National Petroleum Corporation (CNPC), China Petroleum & Chemical Corporation (Sinopec), and China National Offshore Oil Corporation (CNOOC), along with other crude oil processing enterprises , must organize the production and transportation of refined oil products to ensure stable market supply and strictly implement national price policies. Relevant departments at all levels should strengthen market supervision and inspection, severely punish any violations of national price policies, and maintain normal market order. Consumers can report price violations through the 12315 platform.
