International oil prices have recently fluctuated and risen. Based on a comparison of the average price of the 10 working days prior to February 24th with the average price of the 10 working days prior to the last price adjustment, and in accordance with the current refined oil pricing mechanism, starting from 24:00 on February 24th, domestic gasoline and diesel prices (standard grades, the same below) will increase by RMB 175 and RMB 170 per ton, respectively. The adjusted maximum retail prices of gasoline and diesel in various provinces (autonomous regions, municipalities) and central cities are shown in the attached table.

China National Petroleum Corporation (CNPC), China Petroleum & Chemical Corporation (Sinopec), and China National Offshore Oil Corporation (CNOOC), along with other crude oil processing enterprises, must organize the production and transportation of refined oil products to ensure stable market supply and strictly implement national price policies. Relevant departments at all levels should strengthen market supervision and inspection, severely punish any violations of national price policies, and maintain normal market order. Consumers can report price violations through the 12315 platform.
