Since the domestic refined oil price adjustment on March 23, international crude oil prices have fluctuated significantly. To mitigate the impact of rising international oil prices on the domestic market, the government continues to implement control measures on refined oil prices. According to the refined oil pricing mechanism, starting from 24:00 on April 7, the prices of gasoline and diesel (standard grades) in China should have increased by 800 yuan and 770 yuan per ton respectively. After the adjustment, the actual increase was 420 yuan and 400 yuan respectively.

PetroChina, Sinopec, CNOOC, and other crude oil processing companies must organize the production and transportation of refined oil products to ensure stable market supply and strictly implement national price policies. Relevant departments at all levels should strengthen market supervision and inspection, severely punish any violations of national price policies, and maintain normal market order. Consumers can report price violations through the 12315 platform.
