Since the domestic refined oil price adjustment on April 7, international crude oil prices have fluctuated wildly. After a sharp decline in the previous days, they rose significantly again on April 20. However, the average price of the 10 working days prior to this adjustment is still lower than the average price of the 10 working days prior to the last adjustment. Based on the changes in international oil prices, starting from 24:00 on April 21, the domestic prices of gasoline and diesel (standard grades) will be reduced by 555 yuan and 530 yuan per ton, respectively.

PetroChina, Sinopec, CNOOC, and other crude oil processing companies must organize the production and transportation of refined oil products to ensure stable market supply and strictly implement national price policies. Relevant departments at all levels should strengthen market supervision and inspection, severely punish any violations of national price policies, and maintain normal market order. Consumers can report price violations through the 12315 platform.
