Since the domestic refined oil price reduction on April 21, international crude oil prices have fluctuated wildly, experiencing a sharp rise followed by a recent decline. The average price of the 10 working days prior to this price adjustment is higher than the average price of the 10 working days prior to the last price adjustment. Based on changes in international oil prices, starting from 24:00 on May 8, the prices of domestic gasoline and diesel (standard grades) will be increased by 320 yuan and 310 yuan per ton, respectively.

PetroChina, Sinopec, CNOOC, and other crude oil processing companies must organize the production and transportation of refined oil products to ensure stable market supply and strictly implement national price policies. Relevant departments at all levels should strengthen market supervision and inspection, severely punish any violations of national price policies, and maintain normal market order. Consumers can report price violations through the 12315 platform.
