Since the domestic refined oil price adjustment on July 17, international crude oil prices have fluctuated wildly. After a sharp rise in the first few days, prices fell back, but have recently surged again. The average price of the 10 working days prior to this adjustment is higher than the average price of the 10 working days prior to the last adjustment. Based on changes in international oil prices, starting from 24:00 on July 31, the prices of gasoline and diesel (standard grades) in China will be increased by 685 yuan and 655 yuan per ton, respectively.

PetroChina, Sinopec, CNOOC, and other crude oil processing companies must organize the production and transportation of refined oil products to ensure stable market supply and strictly implement national price policies. Relevant departments at all levels should strengthen market supervision and inspection, severely punish any violations of national price policies, and maintain normal market order. Consumers can report price violations through the 12315 platform.
